PROFESSIONAL PROFILE

As a Java Full-Stack Developer, I possess hands-on experience across the entire stack. My skills include Frontend development (HTML, CSS, JavaScript, Bootstrap) and Backend programming (Java, C#, SQL Server), along with the creation of APIs using the .NET framework. I am now actively looking for an opportunity to leverage my technical and interpersonal skills, contribute meaningfully to team goals, and follow a clear career path to reach the Senior Full-Stack Developer level.

HARD SKILLS

C# | VBA .NET | Java | JavaScript | CSS | HTML | Bootstrap | CSS | Python | Git | Oracle | Sql Server | Jira | SCRUM Methodology

SOFT SKILLS

Communication | Teamwork | Proactivity | Self-Management | Attention to Detail | Forward-Thinking | Growth Mindset

ACADEMIC PROJECTS

Java Developer | E-commerce Amanalli (2025- 2025)

- Development of an e-commerce website for the commercialization of Mexican artisan products. The front-end was built using HTML, CSS, and JavaScript along with the Bootstrap framework. Java was used to manage key back-end functionality, including user access, registration, and the purchase process. The entire project was executed using the SCRUM methodology.

Senior Developer | Fake news identification (2022- 2023)

- Designed and developed an application focused on fake news identification to mitigate the spread of misinformation among students. This solution was implemented using Python and leverages both supervised and unsupervised machine learning algorithms.

Senior Developer | CRUD E-commerce (2022- 2022)

- Designed and developed a full CRUD system to manage the inventory for a software product E-Commerce. The front-end functionality was built using PHP, CSS, and JavaScript, with Apache used for server deployment. C# was utilized specifically for managing the secure connection and access to the database.

WORK EXPERIENCE

.NET Developer | DSG Corp (2023 - 2025)

- Developed an API to screen prospects against a blacklist for trust acquisition.
- Resolve user-reported support tickets for bugs and errors affecting the fiduciary system.

QC Tester | AMCO (2022 - 2023)

- Execute UAT within the Pre-Prod environment.
- Configured VPN access for different regions of Latin America.
